

LANCEY Early connects to the Linky™ device through a dedicated slot on the meter. It receives all electricity consumption or production data and transmits it directly to our servers to **optimize your energy management**.

This Local Radio Transmitter is installed in just a few minutes, connected via smartphone and allows you to quickly benefit from all the LANCEY technology for your home.

Thanks to **data encryption and secure transmissions**, we ensure information management in accordance with the GDPR laws in place.

LANCEY Early allows you to **control your self-consumption** and batteries in the most efficient way possible and consequently reduce consumption.

MAIN TECHNICAL CHARACTERISTICS

Quick to install and no tools required, the LANCEY Early is integrated with the Linky™ and connected to the home/building's wifi.

LANCEY Energy Storage ensures that your data is transmitted encrypted and securely.

Simply set up your LANCEY Early from your smartphone.

Optimization of electricity consumption and production through the energy management system.

Direct study of the results and adaptation of the needs.

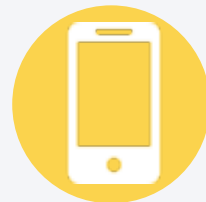

Data security

Intuitive interface and performance

Easy set up

Configuration via smartphone
